FACULTY 1902 = 1903.

JAMES S. HATHAWAY, A. M., M. D., President,
Professor of Psychology, Pedagogy, Lecturer on Hygiene and Ethics.

.....
Principal Normal Dep't., Professor of Latin and Mathematics.

T. J. GARTH,

Professor of Natural Science and of Agriculture.

MOSES A. DAVIS,

Professor of Mechanics and Manual Training.

MARY L. CAMPBELL, B. L.,

Instructor in English, and in Music.

SAMUEL M. VANCELEAVE, A. M.,

Professor in the Preparatory Department.

CHARLES T. COOK,

Professor in the Preparatory Department.

EDWARD E. MURRELL,

Instructor in Printing and in the Normal Department.

ADDIE G. SMITH,

Matron and Cooking Teacher.

FRANCIS M. WOOD,

Steward; Instructor in Night School.

MARY C. REED,

Teacher in Sewing.

LLOYD GRAVES

Foreman on the Farm.

FACULTY 1903 = 1904.

JAMES S. HATHAWAY, A. M., M. D., President,
Professor of Pedagogy, Lecturer on Hygiene and Ethics.

W. H. Clark
.....
Principal Normal Dep't., Professor of Latin and Mathematics.

T. J. Garth
.....
Professor of Natural Science and of Agriculture.

MOSES A. DAVIS,

Professor of Mechanics and Manual Training.

MARY L. CAMPBELL, B. L.,

Preceptress; Instructor in English, and in Music.

SAMUEL M. VANCELEAVE, A. M.,

Principal of the Preparatory Department.

CHARLES T. COOK,

Professor in the Preparatory Department.

EDWARD E. MURRELL,

Instructor in Printing and in the Normal Department.

FRANCIS M. WOOD,

Steward; Instructor in Normal Department.

ADDIE G. SMITH,

Matron and Cooking Teacher.

MATTIE A. CREWS,

Teacher and Stenographer.

MARY FLETCHER,

Teacher in Sewing.

LLOYD GRAVES,

Foreman on the Farm.

FURNISHED ROOM

MECHANICAL HALL

ANNOUNCEMENT

General Statement.

THE Kentucky Normal and Industrial Institute is situated one and one-half miles from Frankfort on a beautiful hill over-looking the city.

The site comprises about forty acres, upon which are located the main buildings, recitation rooms, chapel, mechanical hall, dormitories, and cottages for the resident professors.

OBJECT.

The original object of this institution, established and maintained by an act of the General Assembly, "shall be the preparation of teachers for the Colored Public Schools of Kentucky."

In addition to its Normal Course, giving a thorough and accurate training in English, mathematics and the sciences, this school offers excellent facilities in carpentry, blacksmithing and wheel-wrighting, printing, practical farming, and broom-making, for boys; it aims to make the girls practical and useful members of the home by adding to a thorough English

training a knowledge of cooking, housekeeping and sewing.

N A M E.

In conformity with the added facilities, the recent legislature changed the name of this institution to **The Kentucky Normal and Industrial Institute for Colored persons**; catalogues, hereafter, and all matter of this institution will conform to this change.

ADVANTAGES.

1. *The school is located at the capital where one can observe largely the operation of state government.*
2. *Situation high and healthful; also sufficiently far from the city to be free from its noise and temptations, and yet near enough to enjoy its cheapness of trade.*
3. *Thorough mental, moral, and industrial training by means of well selected curriculum, regulations and lectures under direction of a corps of able instructors.*
4. *A Normal Course associated with any one of a diversity of industrial courses.*
5. *A Diploma to graduates from the Normal Course which grants the owner the privilege of teaching in the common schools of the State without examination.*
6. *Cheap rates which are due to the aim of having pupils simply pay the COST of what they get. It is not the purpose of the school to make money.*
7. *A farm of over two hundred and fifty acres of land, adjoining the institution and on which many young persons can earn means to assist in defraying their expenses in school.*

This school solicits a liberal patronage from the young men and women who are trying to make themselves useful: also parents and guardians seeking a practical and useful education for their children will do well to consider the advantages offered at the Kentucky Normal and Industrial Institute.

EXPENSES.

Tuition (to residents of Kentucky).....FREE.

Annual entrance fee.....\$1.00.
Board, including table fare, room furnished, (with the exception of pillows and bed-covering) fuel, lights, use of laundry room, etc., per month.....\$7.50.

Students from other states are required to pay a tuition of two dollars per month.

TERMS OF ADMISSION.

"Any pupil, to gain admission to the privileges of instruction in the said Kentucky Normal and Industrial Institute, shall be at least sixteen years of age, possess good health, give satisfactory evidence of good moral character, and sign a written pledge to be filed with the President that said applicant will, so far as practicable, teach in the Colored Common Schools of Kentucky a period equal to twice the time spent as a pupil in said Kentucky Normal and Industrial Institute, together with such other conditions as the Board may, from time to time, impose. But no pledge shall be required of pupils who matriculate in the departments of agriculture or mechanics. Should any pupil fail to teach the prescribed time in the Colored Common Schools of the State, he or she shall be liable for such tuition as the Board may determine." In addition to the foregoing requirements, every applicant for admission to the Normal department of this school must pass a satisfactory examination in the subjects taught in our Preparatory department or their equivalents, attaining an average of not less than seventy-five per cent.

The Seventeenth Session of this Institution, on Normal Hill, in the immediate vicinity of Frankfort, Kentucky, will open for the admission of pupils of both sexes on Wednesday September 24th, 1903 and will close on Wednesday, June 1st, 1904; but pupils will be received at any time during the session.

DEPARTMENTS

LITERARY DEPARTMENT

NORMAL COURSE

THE design of the course of study in the Normal Department is to prepare our students for teachers in the common schools of this State, and to give them such industrial training as will better prepare them to discharge intelligently the duties and responsibilities of citizenship.

The course of study in the Normal Department is arranged for three years, named respectively, the Junior, the Middle, the Senior Years; each year is divided into three terms, named respectively, the First or Fall, the Second or Winter, the Third or Spring Term.

No student will be permitted to enter the Normal Department who has not thoroughly mastered the common school branches as taught either in the common schools or as taught in our Preparatory Department.

All students who complete the prescribed course of study in the Normal Department will be given a State Diploma which will entitle them to teach in the common schools of this state without further examination.

A special Teachers' Course, embracing a period of four years, of two terms each year, is also arranged, so that those who are compelled to teach

during the Fall Term may enter at the beginning of the Winter Term each year except the senior year. The following is the outline of the Normal Course.

JUNIOR YEAR

PREPARATORY COURSE

THE design of the Preparatory Course is in keeping with the name, thoroughly to prepare its pupils for successful prosecution of the Normal Studies; and while no certificates are granted from this course, many of the students teach successfully in the Common Schools of the State.

The following is the outline of the Preparatory Course.

THIRD YEAR

FALL TERM

Arithmetic.....	Robinson
Grammar.....	Harvey
Geography.....	Frye

tance of the course of study that will awaken all the activities of the child's mind.

PEDAGOGY

One term is devoted to the study of pedagogy. The principles learned in psychology are put in practice in the class in pedagogy. An opportunity is given the students to show their method of teaching the different branches in the primary grades. The instructor presents his methods and calls attention to the psychological principles underlying them. The purpose is to develop power and skill.

LATIN

Perhaps there is no subject in the course of study that will assist the student in correct thinking and give him a better command of language than Latin. We strive to present the subject in the most approved method, that the activities of the mind may be brought out and the interest maintained. Special attention is given to the derivation of words and to increasing the student's vocabulary.

ALGEBRA

Emphasis is placed on the fundamental principles in algebra. The parenthesis, minus sign, and factoring receive special attention. The course begins in the winter term of the Junior year and extends through the Middle year. Importance is given to drill and thoroughness in work done.

GEOMETRY

The course in Geometry extends through two terms and at present includes plane and solid Geometry. While a great deal of stress is not placed upon the number of "books" studied, yet the work is intended to be sufficiently comprehensive to give a broad idea of the subject. To search after truth, to create a love for original work, and to improve the student's reasoning faculties, are the ends sought.

Six months of the school year are devoted to plane geometry and the remaining three months to solid geometry. It is hoped that more time will be given to the study as soon as practicable.

NATURAL PHILOSOPHY

This subject is studied during the three terms of the Middle year. Special attention is given to such parts as will aid the

student in practical life. Experiments are performed to illustrate the important principles of machines, hydrostatics pneumatics, heat, sound, and electricity. The school has a large laboratory for physical experiments. New apparatus is being added every year.

BOTANY

This subject is taught one term with a view of giving a general knowledge of the morphology, physiology and classification of the more common plants of the state. Each student will make an herbarium of at least twenty-five different plants. Frequent excursions into the neighboring country are made for collection of native specimens.

CHEMISTRY

This subject is taught during the senior year. The first two terms are devoted to general chemistry. The third term is devoted to agricultural chemistry. The students do laboratory work each week. The different acids, bases, salts, and soaps are made and carefully studied. Some practice is given in qualitative and quantitative analysis. Chemical and physical analysis of the soil are made. Special attention is given to domestic Chemistry.

WRITING

Writing is taught throughout the preparatory course. The Spencerian system is used, as best adapted to producing rapid as well as legible penmanship, by its smooth, graceful, easy, running movements. Position, movements, analysis of small letters, capitals, figures, spacing, shading are taught as mentioned, the theoretical forming the foundation for the practice work which consumes much of the lesson period.

BOOK-KEEPING

One term is devoted to book-keeping. A thorough drill is given in business forms, commercial notes, drafts, bank notes checks, etc. The students are given actual practice in both single and double entry book-keeping.

DRAWING

Free-hand drawing is taught. The main object of the course is to develop the best mental power, to create imagination and to acquire manual skill by doing things. The three correlated subjects in drawing, representation, decora-

tion and construction, are taught as nearly parallel as possible. Sketching with pencil and crayon throughout the entire course.

MECHANICAL DRAWING

The aim of this course is not to train regular draughtsmen, but more to teach students accuracy and neatness and to give them general ideas of how to read and understand a drawing.

The subject is taught by a series of plates which become more complicated as they advance. Each student is furnished with a drawing board, T-square, rule, thumb tacks, drawing instruments and paper. He is given a "blue print" copy of a plate accurately drawn, lettered and figured, from which the student draws his own plate, first with pencil and then it is "inked in" with India ink.

The course extends through three years and permits some original designs to be executed in the senior year.

ELOCUTION

Juniors. One term is devoted to the principles of reading, drill in qualities of excellence, and recitation.

Rhetoricals are held in the different departments each week. Students are drilled in expression and delivery.

ETHICS AND MORAL PHILOSOPHY

Any education is a failure which does not largely comprehend the principles of Ethics and Moral Philosophy. To the end that our students may be definitely impressed, the subject of Ethics is treated in the Preparatory course and that of Moral Philosophy is offered in the final year of our Normal course.

POLITICAL ECONOMY

A knowledge of the principles of Political Economy is essential to good intelligent citizenship, the end which this Institution earnestly proposes. The intelligent voter is the safe guard to American institutions, and in order that the future voter may have intelligent ideas along commercial and other allied lines, the subject of Political Economy is offered our students in the Senior year.

INDUSTRIAL DEPARTMENT

THE Industrial courses of this Institution are designed not only to give manual training to young men and women, but to fit them to become useful and productive citizens as well. Persons that have received certificates from departments here are earning their livelihood by means of the Industry they pursued with us. Our courses are not too extensive nor technical, but thoroughness in every requirement will be insisted upon to the end that a Certificate of Proficiency which shall be granted to persons completing any one of our industries, shall indicate that full time and attention have been given to the work and that the holder of the certificate is competent to satisfy an employer, or succeed where success is possible.

PRINTING COURSE

The course in the Printing Department is arranged to give students instruction in the fundamental principles underlying the work, to thoroughly train them in the simpler forms of the Art and then proceeds to its more complex features. It aims to sufficiently prepare students to execute with dispatch, in an artistic style, all kinds of ordinary printing.

One and one half hour each day is spent in actual work on the various processes of the office.

FIRST YEAR—Care of office, machinery, type, etc. learning technical terms of the trade, plan for laying cases, names, sizes and faces of type, how to meas-

PRINTING OFFICE

CARPENTER SHOP

SOME FARM STOCK

vidual work. Many students earn enough to defray their expenses by doing farm work.

DAIRYING—The school owns a herd of Holstein and Jersey stock, which afford good opportunities for practice in milk and butter making. During the present year several young women and men have availed themselves of these opportunities.

FIRST YEAR

FALL TERM—Soils, their formation and classification, their physical defects and remedies, and lectures on garden and dairy.

WINTER TERM—Artificial and green fertilizers, selecting and testing seed for planting.

Practical and theoretical lessons on dairy farming.

SPRING TERM—Practical and theoretical lessons on the Animal, Mineral and Vegetable kingdoms, and review of the work of the previous terms.

SECOND YEAR

FALL TERM—Text Book; First Principles of Agriculture, by Edward B. Voothees, and practical instruction in making butter and handling Cream Separators.

WINTER TERM—Text Book continued; Dairy farming continued, with diseases of animals, and care of farming tools.

SPRING TERM—Text Book completed.

Lectures on the planting and cultivation of the different farm crops. Making hot beds and cold frames. Dairying and horticulture; and review of the work of the previous terms.

THIRD YEAR

FALL TERM—Text Book, Principles of Plant Culture, by (Goff). Book-keeping, pruning, grafting and budding.

WINTER TERM—Text Book continued. Poultry, sheep and cattle raising. Terracing and draining farm lands.

SPRING TERM—Text Book completed. Previous subjects reviewed. Estimating cost of material and arranging a farm for cultivation, and marketing farm produce. Bee-keeping and lectures on Political Economy.

DOMESTIC ECONOMY

THE course in Cookery embraces a three year's course of fifteen lectures each. The last, or senior, year comprises four extra lectures; namely Nurse's Course in Cookery, Care of Dining Room and Table Service, Food and Its Relation to the Human Body, Household Economy.

The first year's work is opened with an introductory lecture on the Care and Use of the Kitchen. One lecture is delivered a week, and each member of the class is required to take it verbatim, as no special text book is used in the work. Each lecture is followed by a practical demonstration lesson in which members of the class do the work. Each lecture is accompanied by a set of receipts, plain and economical in character, and such as can be used in any household.

The aim of the course is to make good cooks, and to have them become intelligent housekeepers.

FIRST YEAR

LECTURES—Measures, food, creamed and scalloped dishes, rice, eggs, sugar, milk and cheese, baking powder, fat, soups, batters, doughs and stews.

SECOND YEAR

LECTURES—Beef, Mutton and lamb, veal, pork.

COOKING EXHIBIT

meats in general. Meat sauces, broiling, frying and sauteing, roasting, bread making, cake making and frostings.

THIRD YEAR

Wheat, cereals in general, pastry, puddings and sauces, fish, gelatine, custards and creams. Salads, beverages, frozen desserts, preserving, fancy cooking.

SPECIAL LECTURES

Invalid Dietetics, Dining Room and Table Service, Food and its Relation to the Human Body, Household Economy.

SEWING COURSE

THE purpose of this course is to give to the girls the ability to do plain sewing and dressmaking, an accomplishment that no sensible young person will lightly esteem. We feel that this knowledge will serve any young women well in the future and no pains are spared to make young woman proficient in this art.

The course in this branch of work is here-with submitted.

FIRST YEAR

FALL TERM—Rudiments of Sewing. Instruction in the various stitches used in hand sewing, including different seams, hems, bindings, patching and darning.

WINTER TERM—Hand sewing on plain under-wear, button holes, fancy stitches.

SPRING TERM—Advanced hand sewing, hemstitch-

ing, drawn work, and outlining in fancy work.

SECOND YEAR

FALL TERM--Dressmaking. After pupils have become perfectly familiar with all the stitches used in hand sewing, they will be taught the use and care of the machine, the study and use of patterns, cutting and making nice underwear, shirt waists and wash dresses.

WINTER TERM--Cutting, fitting and making lined dresses, dressing saques, capes and jackets, from patterns draughted by seniors.

SPRING TERM--Cutting, fitting and making nice dresses, matching stripes and plaids, a study on the combination of colors and on fancy work.

THIRD YEAR

FALL TERM--Dressmaking. Taking measure, draughting and cutting patterns by the use of tape line and rule, by the table of measures and taking notes on same.

WINTER TERM--The use and study of system, instruction in transferring patterns and diagrams from various pattern sheet supplements, taking notes on same.

SPRING TERM--Thorough study and use of system a study of colors, styles, and their adoption to the age, form and complexion, and fancy needle work.

A suitable lecture preceding each term will be delivered to the different classes. Special information on preservation of the eyes, body and general health in the sewing room will be given.

General Information

THE foregoing and such other studies are presented either from text or orally as will impart that information, discipline and culture as will produce clear and trained minds together with those high and rounded qualities that characterize noble womanhood and manhood.

GOVERNMENT

The government of the school is positive in prohibiting all immoral practices, as well as actions leading thereto, and enforcing a uniform regard for good order, studious habits, and careful observance of the prescribed course of study.

Nothing in our power will be neglected that can add to the mental, moral and manual training of students, or can, in the least, contribute to their comfort and general welfare.

DISCIPLINE

We insist upon regularity in attendance, punctuality in work, faithful application to studies, and gentlemanly and lady like conduct. Each student is expected to deport himself properly. We desire the students of our school to be the very best, the most intelligent and industrious class of young persons to be found in Kentucky. "No drones nor time-killers

will be tolerated within its walls," but live, energetic and industrial young men and women who have a purpose in life, are welcome to our school.

TUITION

Tuition is free to all Colored residents of Kentucky who fulfil the required conditions. To the Colored non-residents of Kentucky, the rate of tuition will be two dollars per month.

IRREGULAR ATTENDANCE

A great difficulty to overcome in our work is that of irregular attendance. Experience proves that those who remain during a session of nine months, attending daily, and remaining each year until after the final term examinations, are the students who succeed the best in all departments. We urge our students to enter school each year as early as possible, and advise that, by all means, they remain until the close of school, even though it may cost a sacrifice to do so. We appeal to parents to keep their sons and daughters in school until the close of same, and not allow them to return home to satisfy their whims at the expense of their mental, moral, and manual training.

LIBRARY

A good library is necessary to the success of any institution of learning; for useful books are invaluable aids in securing a broad and liberal culture. Recognizing this fact, we are endeavoring to establish a good library for our students. Indeed, we have made a creditable beginning, and by requiring our students to pay a matriculation fee of one dollar per year, about nine hundred valuable volumes have been added to our library. The increasing demand for

suitable library books will compel us to continue this increase from year to year.

PERIODICALS

The following periodicals are on file in the reading room: Blue Grass Bugle, Commercial, Standard (Lexington), Kentucky Standard, Major, Colored American, Southern School Journal, Self Culture, Frank Leslie's Monthly, Harper's Weekly, Farmer's Voice, American Kitchen, Delineator, Youths' Companion, Etude, Carpentry and Building, Success, Current History.

APPARATUS

Philosophical instruments, a chemical laboratory, a Lunar Tellurian, excellent wall maps and other school furnishings of value, have been supplied by the state. Additions will be made as required.

LITERARY SOCIETIES

Students are expected to join the "Students' Literary Societies," in which, exercises are conducted by themselves under the general supervision and direction of the Faculty.

LECTURES

Lectures are given monthly by prominent educators in the service of the state.

The following course of lectures was offered our students last year: "Result of Individual Effort"—Robt. Mitchell, D. D., Pastor First Baptist Church, Frankfort. "Character Building"—Prof. S. L. Frogge, Supt. Public Schools, Frankfort. "Human Finny Tribe"—Dr. E. E. Underwood, Frankfort. "Best of Classics"—Rev. E. T. Fishback, Pastor Corinthian Baptist Church, Frankfort. "An Aim in Life"—Rev. J. W. Frazier, Harrodsburg. "Educational Progress of the Race," Wm. H. Mayo, Prin-

CHEMICAL LABORATORY

cial of Colored Public Schools, Frankfort. "Talk"
 —Rev. John H. Frank, Pastor of Fifth Street
 Baptist Church, Louisville

RELIGIOUS

The daily exercises begin with singing, reading a passage from the Bible, then prayer and singing.

Every student is expected to attend some church in the city on Sunday morning.

A non-sectarian Sunday school is conducted under the supervision of the Faculty.

Everything of a sectarian character is carefully excluded from the religious exercises of the Kentucky Normal and Industrial Institute.

The Y. M. C. A. and a religious society for young ladies are both organized and are attended by the students and are helpful and efficient in the formation of character befitting young people of intelligence and culture.

MEDICAL

No pains are spared to preserve the general health of our students intact, and, in case of sickness, to have at hand the best medical service at a minimum cost. By special arrangement a student may purchase a Monthly Medical Attendance Card which guarantees to its holder medical attention from a competent physician free of further charge. This plan has resulted in great good to students the past year, both as to health and financially and is earnestly recommended to the consideration of both students and their parents.

PROMOTION AND GRADUATION

Three years of successful study will be required for graduation in the Normal Department, and four

years in the special Teachers' Course; but certificates of proficiency in the science and art of teaching may be granted to meritorious students.

Written examinations are held in the studies of each term, in addition to an oral examination at the end of the Spring Term. The results of these examinations, averaged with daily recitations, determine the scholarship of the students in their respective studies.

At the end of each term students or guardians will ~~care and provide for the student~~ offender to reprimand, suspension or expulsion.

For additional information write the President of The Kentucky Normal and Industrial Institute, Frankfort, Ky.

teach in the common schools of the state without further examination.

CERTIFICATES OF PROFICIENCY

Certificates of proficiency will be granted to those students who finish any course in the Industrial Department.

to supervision of the faculty.

Everything of a sectarian character is carefully excluded from the religious exercises of the Kentucky Normal and Industrial Institute.

The Y. M. C. A. and a religious society for young ladies are both organized and are attended by the students and are helpful and efficient in the formation of character befitting young people of intelligence and culture.

MEDICAL

No pains are spared to preserve the general health of our students intact, and, in case of sickness, to have at hand the best medical service at a minimum cost. By special arrangement a student may purchase a Monthly Medical Attendance Card which guarantees to its holder medical attention from a competent physician free of further charge. This plan has resulted in great good to students the past year, both as to health and financially and is earnestly recommended to the consideration of both students and their parents.

PROMOTION AND GRADUATION

Three years of successful study will be required for graduation in the Normal Department, and four

derly, subject to inspection by visiting officer every day.

8. As a part of their training in domestic work, young ladies must assist in the care of dining room and halls, and serve their turn in the kitchen.

9. Students, after entering school must not leave the city without the permission of the President.

Other rules will be made as necessity requires.

10. A violation of one or more of these rules made for the general good of the school and for the special care and protection of the students, will subject the offender to reprimand, suspension or expulsion.

For additional information write the President of The Kentucky Normal and Industrial Institute, Frankfort, Ky.

POINTS

(more or less repetitions), for persons who contemplate attending this school.

1. Students will be received at any time.
2. Persons under sixteen years of age cannot be received into the boarding hall, nor enter in the Normal Department, younger persons may enter the Preparatory Department however.
3. Persons intending to enter school must bring from some responsible person a letter of recommendation to be filed with the President.
4. Each room at the dormitories is furnished with bedstead, mattress and springs, washstand, bowl and pitcher, stove or grate, fuel, table, oil, chairs and looking-glass.
5. A prospective student should bring a pillow, sheets, and quilts.
6. Students can have their laundrying done at a very reasonable price. Young ladies may do their own laundrying in the school laundry, they furnishing their own soap, bluing and starch.
7. As far as practicable, students are saved the expense of buying books; a prospective student should bring with him the books he used last—perhaps some of them, if not all, may be used here.
8. Vocal music, free; instrumental music (piano or organ), two dollars per month—one dollar for lessons and one dollar for use of instrument.
9. Among the possessions of a student of The Kentucky Normal and Industrial Institute may generally be found soap, towels, tooth brush, hair comb and brush, clothes brush and shoe brush.
10. At the Kentucky Normal and Industrial In-

stitute it is felt that the sum and substance of education is Integrity, Industry, Intelligence, and the student is expected to strive earnestly to possess himself of these characteristics.

11. A cordial welcome from faculty and students awaits the young man or woman who seeks the advantages of The Kentucky Normal and Industrial Institute for the purpose of a nobler and more useful life.

"KNOW THY OPPORTUNITY"

Young men of health, resolution and merit who are determined to prepare themselves for increased usefulness have an opportunity, if they wish to work their way through school. They may work on the farm or premises for wages which in a few months amounts to a sum that warrants them in entering day school. During the time they are at work, however, they have the advantage of night school.

If interested, send for circular explaining the plan in full.

STUDENTS IN 1902 = 1903.
